DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Tajiri (5,727,009).

With respect to claim 1, Tajiri discloses a semiconductor laser element (58) disposed inside the insulative frame (54), the semiconductor laser element emitting laser light in a plane direction; a reflection grating (59) disposed inside the insulative frame, the reflection mirror reflecting the laser light in an upper direction; a light acceptance unit (60) for signal detecting disposed inside the insulative frame, the light acceptance unit detecting signal of incident laser light; and a plurality of leads (53) fixed in the end walls opposed to each other in the longitudinal direction of the insulative frame, plurality of leads extending in a horizontal direction; wherein the insulative frame is made of liquid chemical compound (col. 21, lines 4-67) see figure 21.

With respect to claim 2, Tajiri discloses a semiconductor laser device as claimed above wherein one end of each the leads protrudes inside the end walls and wherein

Art Unit: 2828

openings are formed above and beneath the end of each of the leads on the upper and lower surfaces of the insulative frame (see figure 21).

With respect to claim 3, Tajiri discloses a semiconductor laser device as claimed above wherein thick portions are formed on both side walls extending a longitudinal direction the insulative frame (see figure 21).

With respect to claim 4, Tajiri discloses a semiconductor laser device as claimed above wherein the reflection grating (59) is mounted using UV resin (col. 22, lines 49-55).

With respect to claim 5, Tajiri discloses, a semiconductor laser device (58) as claimed above wherein the light acceptance unit (60) for signal detecting comprises two light acceptance units, (60a and 60b) (col. 24, lines 5-9).

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Seong (US Pat. 6,587,481) discloses a light emitting module. However, Seong (US pat. 6,587,481) fails to disclose a plurality of leads fixed in the end walls opposed to each other in the longitudinal direction of the insulative frame are accommodated within a common package.
